3D WALL COVERING WITH NO PARALLEL IN TERMS OF QUALITY & FUNCTIONALITIES

PATENTED TECHNOLOGY

- Easy installation on walls and ceilings
- Unique and customisable design
- Extreme soundproof technology
- Most luxurious finishes
- Any colors possible
- Professional acoustic enhancement
- Water resistant and incredibly solid
- Unique lighting solutions
DECORATIVE PANELS

Model 1
- Size: 106.0 x 70.5 cm
- Weight: 14.1 kg
- Thickness: 0.7 - 6.0 cm

Model 2
- Size: 59.5 x 59.5 cm
- Weight: 7.5 kg
- Thickness: 1.5 - 4 cm

Model 3
- Size: 64.5 x 70.0 cm
- Weight: 11.8 kg
- Thickness: 1.5 - 4.5 cm

Model 4
- Size: 22.3 x 38.8 cm
- Weight: 2.9 kg
- Thickness: 0.5 - 6.3 cm

Model 5
- Size: 54.5 x 54.5 cm
- Weight: 8.2 kg
- Thickness: 2 - 4 cm

Model 6
- Size: 55.0 x 61.0 cm
- Weight: 7.0 kg
- Thickness: 3.5 cm

Model 7
- Size: 59.5 x 59.5 cm
- Weight: 11.1 kg
- Thickness: 1.5 - 8 cm

Model 8
- Size: 55.0 x 54.0 cm
- Weight: 8.0 kg
- Thickness: 1.5 - 4.5 cm

Model 9
- Size: 62.5 x 62.5 cm
- Weight: 7.7 kg
- Thickness: 1.5 - 3 cm

Model 10
- Size: 55.5 x 56.0 cm
- Weight: 6.0 kg
- Thickness: 1.5 - 2.7 cm
Model 11
size: 55.5 x 55.5 cm
weight: 2.5 kg
thickness: 1.2 - 1.8 cm

Model 12
size: 68.0 x 58.0 cm
weight: 3.8 kg
thickness: 1.2 - 1.8 cm

Model 13
size: 55.0 x 55.5 cm
weight: 2.5 kg
thickness: 1 - 2 cm

Model 14
size: 60.0 x 60.0 cm
weight: 12.5 kg
thickness: 1.5 - 6 cm

Model 15
size: 49.0 x 59.0 cm
weight: 7.8 kg
thickness: 1.5 - 6.7 cm

Model 16
size: 60.0 x 60.0 cm
weight: 12 kg
thickness: 1.5 - 3.2 cm

Model 17
size: 52.0 x 52.0 cm
weight: 6.5 kg
thickness: 1.7 - 4 cm

Model 18
size: 60.0 x 52.0 cm
weight: 7.2 kg
thickness: 3 - 4.5 cm

Model 19
size: 62.5 x 62.5 cm
weight: 15.5 kg
thickness: 5 - 6.5 cm
Model 5
Model 9
Model 12
with lighting
Model 15
Model 16

CUSTOM DESIGNS

Creme

Armadillo
With an emphasis on environmentally friendly, 100% recyclable products and the creation of fresh accents and clever finishes, we provide authentic, artful identities to any commercial or residential space. There are no limitations in terms of colors, shapes or size. In addition to customization of the desired color, the option of an exclusive glossy, matte, metal, iridescent or holographic finish is available as a final touch.

We gladly produce any of our clients’ own designs. We can even create a diverse corporate design on request. Each detail is thoughtfully created and executed by our great team of professional sculptors, architects, and interior designers. By blending innovation, the latest technology and conventional craftsmanship, we deliver lightweight, easily installed products and solutions with the capability of providing acoustic diffusion and sound insulation as well as heat and water resistance.
SOUND INSULATION
Our noise control panels are tested in certified European laboratory according to EN ISO 10140. The airborne sound reduction index Rw can achieve up to 64 dB on different types of main partition walls. This feature can be perfectly used for clubs and bars, hotel rooms and any other spaces that need the best combination of sound insulation and aesthetic.

ACOUSTIC ENHANCEMENT
Some of our panels are used as sound diffusers to enhance acoustics. The shape of the panels and the hard material used, is perfect for controlling the primary reflection of sound waves with average diffusion coefficient 0.67 and above 0.75 in the high frequencies above 1.25k. Deep 3D relief panels with thoughtfully calculated omnidirectional reflection are optimal.

WATERPROOFNESS
The high tech patented layer that we carefully treat each of our gypsum panels with, makes them watertight. Our material shows incredible low liquid-water transmission rate, making our panels suitable for spaces with very high humidity, such as spa and bathrooms.

NON-COMBUSTIBLE
Our wall and ceiling coverings have A1 class of fire resistance (100% non-combustible and non-flammable) and therefore are suitable for spaces with the highest requirements in that matter.

LIGHTING ART
We enhance some of our panels into illuminating art pieces, replacing conventional lighting. They incorporate the latest LED technology on request combined with a system for management of light intensity. High illumination power and soft glow are simultaneously achieved thanks to large light emission areas. Fixture could be build-in, recessed or surface-mounted with different types of shade.

CONFORMITÉ EUROPÉENNE
Our wall panels are certified to meet the requirements of the applicable European Community directives. Herewith we assure that our products comply with health, safety, and environmental protection standards for products sold within the European Economic Area.
Our wall and ceiling coverings are offered with the most luxurious finishes to meet the expectations of the most demanding clients. A finish is a work of art and a significant part of the main product. In order to look flawless, the finish requires treatment by professionals, possessing enormous experience in the field, knowhow and the according tools.

We offer our products with four types of finishes: latex paints in any color, automotive paints for extreme glossiness and ceramic effect, high-end Italian plasters for ultimately elegant finishes such as pearly or shagreen finish and metal paints for a wide range of metal effects such as zinc, copper or gold with different effects such as patina.

**LATEX PAINTS IN RAL**

The basic finish that you can order is latex paint. That type of finish is available in any color. Before the actual painting, the elements get a preparatory coating. Then several layers are sprayed on, in order to achieve a flawless look without any paint drops or inconsistencies. If a glossy effect is desired, additional varnishing is performed. The result is excellence in any color.
CAR PAINT

For a superior glossy finish we use automotive paints. The result reminds of porcelain or ceramic. You can additionally have chameleon effects with one or more nuances changing with the light reflection or pearly pigmentation. You can simply point at any vehicle’s finish and we will put it on your wall or ceiling.

Besides the superior look, these paints are known to be the most durable and resistant ones - that is why they are used in car painting. A complex process has to be followed with several different coats applied in a very precise way, to achieve perfection in look and quality.
ITALIAN DECORATIVE PAINTS AND PLASTERS

Our precisely sculptured 3D elements make a perfect match with the high-end Italian plasters and decorative paints, developed by OIKOS. The result is ultimate elegance for the most demanding clients.

PALLAS is an even color, silk finish with different grainy texture and varying reflection depending on the light intensity. The combination of modern 3D forms and finish, relighting the antique splendor, makes this decoration unique.

IMPERIUM is a metallic decorative finish with a high intensity of pearls if desired. These plasters combined with the modern shapes of our panels create pure contemporary art feeling and are especially suitable larger walls and ceilings.

NOVALIS FERROMICACEO is a special enamel created with acrylic resins and mica pigments that give our panels an aged, wrought iron finish. The particular tile structure of the pigments creates a barrier against atmospheric agents and UV rays. This finish could be also used in spaces with very high humidity.
METAL FINISH

Together with VeroMetal® we offer a new type of contemporary wall and ceiling decoration. The result is 3D sculptures covered with metal.

VeroMetal® is a hard metal coating and consists up to 95% of metal. This finish is available in different metals such as aluminium, bronze, copper, iron, zinc, stainless steel, tin, nickel-silver, gold, gunsmoke, reflex S01 and medical 01 copper.

Depending on the way of application, polishing and the tools used, different effects could be achieved such as shiny, rust or patina.
